## Skills:

### Languages:

- English
- Arabic
- Urdu
- Punjabi
- Hindi

### Back End

#### Development:

- C
- Python
- JavaScript
- Java

### Front End

#### Development:

- HTML
- CSS
- React JS

## Education

### University of Massachusetts Boston (UMB)

BS, Computer Science

GPA: 3.76

(January 2022 - May 2026)

## Work Experience:

### Developers Incorporated ([Devsinc](#))

July 2023 – August 2023

#### • Web Development Intern

- > Made a responsive website using only HTML and CSS.
- > Implemented Factory Design Pattern to make the backend of a car manufacturing factory that can create custom cars as well as pre-defined cars.
- > Made a Burger Builder app with Login Authentication that stores multiple users with their own specific orders.
- > Created a simpler version of the Splitwise app for expense management.

### University of Massachusetts Boston (UMB)

September 2023 -- Present

#### • Peer Tutor

(Mathematics, Computer Science, Economics, Philosophy)

- > Provided one-on-one personalized tutoring to 12 people per week for 2 months.

September 2022 – December 2022

#### • Supplemental Instructor for Computer Science

- > Taught core computer science concepts to multiple classes of more than 20 people.
- > Delivered tailored support to students, addressing their unique coding and logic challenges while adapting to their individual aptitudes.

## Extra-curriculars:

- Played Squash at Lahore Punjab Club for almost 2 years
- Played Soccer for my Highschool team & 2 years' experience playing Billiards and Snooker
- Participated in local gaming tournaments - FIFA

## Projects:

- Created a Splitwise App that stores multiple users and keeps track of their bills and payments and how much each person owes to another or is owed from another. Additional payments can be added to multiple people at the same time.
- Created a Burger Builder using React JS which involves managing multiple states and multiple users, logging them in and out, keeping track of their past orders as well as adding new ones.
